

ROZAWOOD
DIAMOND-28 

reincarnation
of a legend

Diamond Guitars recreates the 1934 D-model

In 1934 the Martin Guitar Company officially offered the D-28 with the 14-fret neck. This D-model is the world's most successful acoustic guitar.

Diamond Guitars' interpretation is handbuilt by master luthier Roman Zajicek. We named her Diamond-28.

She is all about world class craftsmanship, artistic power, mastergrade woods, great tone, smooth playability and a beautiful body. And to complete this special edition we crowned her with a genuine diamond on the headstock!

Check out her creation at www.diamondguitars.eu and Roman Zajicek's Rozawood at www.rozawood.cz

Our philosophy

Diamond Guitars' philosophy is to represent worldclass, innovative and independent guitarbuilders and connect them with players that love and support the art and craft of handmade guitars. The goal is to inspire and learn from each other. We work with builders that offer the world's finest instruments. They are able to build guitars to custom specifications and willing to help us with advice on maintenance and repair of the instruments. Our expertise combined with knowledge and experience of the luthiers will help you find your dream guitar!
